

At AWH we believe that the power of digital technologies can change the world. Clients come to us and we build new digital products together, like:

- A cloud-connected next-gen IoT exercise device that improves your health – even if you have mobility issues.
- An API-driven data warehouse that brings together donors and their financial resources with non-profit organizations doing good work in Central Ohio.
- A phone app that helps immigrants upload paperwork to the U.S. government.

And these are just three projects that we worked on last week! In case you get tired of doing good for the world, we also take on crassly commercial projects that will expose you to some of the biggest enterprise organizations on the planet.

AWH, a 24-year old software engineering firm, is in serious growth mode. We're looking for developers in the .net space that want to learn new languages and frameworks while changing the world one application at a time.

Isn't it time to have a conversation with a company that does GREAT! things every day?

Technology requirements:

2 years experience .NET, C#, JS, HTML5, CSS, SQL, Xamarin for mobile a plus

Attitude requirements:

Interested in learning new things constantly, working in an Agile environment, elbow-to-elbow with some of the brightest minds in Central Ohio? We solve digital problems in elegant ways across the full stack.

Location requirements:

We're sorry, but we cannot sponsor at this time and you must live in Columbus, Ohio.

What we offer:

The AWH developer role is a full-time gig on-site in our Dublin, Ohio office. We offer a great benefit package as well as all the gummy bears you can possibly consume.

Send your resume and salary requirements to robin.walters@awh.net.
