

Software Developer (All Levels)

Are you looking for an opportunity to make a big impact in a growing company? Are you excited about the thought of transforming an industry? nChannel is looking for people just like you to join our growing team.

Our cloud-based software solution and professional services are transforming how businesses sell products. We're looking for people who share our passion about helping these eCommerce and retail merchants grow their businesses.

nChannel offers a generous employee benefits program including medical, dental, vision, life insurance, 401k plan, and paid holidays and vacation. We are an EEO employer.

We also offer an exciting "startup" culture, where everyone has an opportunity to take a leadership role. We work hard, and we play hard. And, we're scaling that culture!

Listed below are the current available positions, but we are always looking for people with the right fit. Don't hesitate to send us a resume if you think that's you...

Software Developer (All Levels)

Location: Columbus, OH or Belpre, OH

Are you a software developer interested in working on groundbreaking projects? We're looking for Ohio's best and brightest engineers to help us take our platform to the next level. If you are truly passionate about software, we want to talk to you.

Of course we're looking for engineers with technical qualifications that align with our technology stack. But, above all we are looking for those who view software development as a craft. We want people who are dedicated to improving themselves and their teammates. We want people who appreciate the art of *how* you build software—not just the code itself.

And, we have opportunities for software developers **at all career levels.**

Qualifications

Ideal candidates will have the following:

- Experience with some combination (or all) of the following technologies...
 - .Net Framework (including .Net MVC)
 - Windows Workflow Foundation Services
 - Node.js
 - Angular (or comparable JS frameworks)
 - MongoDB
 - Microsoft SQL Server
 - PowerShell
- Understanding of software development within the Agile process
- Understanding of source control systems, ideally Microsoft TFS and/or Git
- Strong communication skills and a positive attitude
- Track record of innovative, outside-the-box approaches to solving problems
- A developer-as-craftsmen mindset

Even better if you also have:

- Experience administering continuous integration environment (Hudson, Jenkins, Bamboo, etc.)
- Applied understanding of test-driven development
- Experience working in or desire to work in a fast-moving startup environment
