

Tech Analyst

Who we are:

Juggle is a start up team working virtually to create the best mobile services platform in the market. Our first service is baby sitting. Juggle is proven with over 3,500 families and 2,000 sitters using the platform in 4 markets. We are poised to scale.

Currently, our team of 6 includes 1 full time software engineer. We are looking to grow the tech team to 3 in the coming months.

What we need:

Tech Analyst (Jr. Software Developer)

In the role of Tech Analyst you will grow with Juggle. The ideal candidate will be fearless in learning new technologies, supporting users, and improving platform efficiency. No specific experiences are required however a broad understanding of current technology platforms and basic software development techniques is desired.

Our current tech stack is:

- *AWS
- *Ruby on Rails
- *React Native
- *Word Press
- *Stripe
- *FreshDesk

If interested send an intro email to greg@whyjuggle.com, include your resume and salary expectation
